THE DIFFERENCE BETWEEN SOMETHING GOOD AND SOMETHING GREAT, IS THE ATTENTION TO DETAIL

Our family consists of children and parents and grandparents, and dogs and cats and large or small barking and chirping friends. When we are building furniture, we do so with our family in mind this is why we use the very best materials and techniques available right now. Success is not necessarily an economic measure for us, it is a measure of love and care and comes in many shades and forms and with lots of features.

We invite you to take a look inside our furniture to discover features and benefits which make our products unique and superior to any other furniture brand you may have heard of. After all, Quality is a journey, not a destination therefore we must assure that the journey is a pleasant, safe and comfortable one.

WHY ROMINA FURNITURE IS DIFFERENT

GREENGUARD GOLD STANDARD

Most of the exposure to toxic chemicals occurs not by direct contact but by breathing contaminated air: the chemical pollutants come from materials used in everyday day products, things we utilize or consume. Some toxic components are present in all air because of industrial activity or transportation but studies show that indoor air is actually 2 to 5 times more polluted than the outdoor environment. Given that most people spend a majority of their time indoors and especially children and infants, it is very important to assure that her/his furniture does not have any toxic emissions. All Romina baby cribs and dressers are GREENGUARD Gold Certified and periodically tested in a sealed chamber where air quality and its chemical composition is analysed. This standard and its rigorous testing process exceeds all mandatory testing procedures including ASTM, California Proposition 65 and CPSC 16CFR1219.

NON-TOXIC FURNITURE

Yes, you have probably seen a lot of manufacturers painting the inside of the drawers or covering the bottom with some veneer, contact paper or fancy looking fabric. Sometimes these coverings may look very nice but your clothes surely do not appreciate this. The inside of the furniture does not get the same type of ventilation as the exterior sides so wood should and must be allowed some "breathing" room. Contact paper, plastic, polyurethane or textile elements will likely need some ventilation too. So wonder no more when your shirt smells funky in the other dresser that you purchased from Sweden's favorite furniture store. If it doesn't smell good, it's not good for you. All our furniture is made of solid wood, no substitutes and no fine print.

HYDRAULIC DRAWER AND DOOR SYSTEMS

Our case items are equipped with the best systems currently available in furniture manufacturing. Our drawer systems are manufactured in Germany and feature a hydraulic soft-closing operation guaranteed for 80,000 cycles or approx. 73 years. We are going further and incorporating the latest and most efficient technologies currently available in furniture making. All of our furniture (not only cribs) are Greenguard GOLD certified, all of our drawers are standardly equipped with safe-closing drawers and anti-tipping systems. All of our furniture is designed to be your child's safest and most comfortable place to sleep and grow around.

SOLID WOOD

Yes, this is a term that is often loosely used by other manufacturers who conveniently utilize "wood-like" materials. Our products are made with 100% solid wood and no, MDF is not solid wood. All of our products are constructed from wood boards and blocks which are non-chemically treated to increase inner strength and environmental tolerance. Structural frames have own-dowels in addition to adhesives and/or pocket screws, drawer boxes are made with wood boards and you won't find any wood substitutes in the construction of a Romina furniture piece.

SOLID WOOD IS THE BEST CHOICE FOR FURNITURE. THE MORE WOOD, THE LONGER THE FURNITURE LASTS, THE BETTER IT PERFORMS OVER TIME, THE HEALTHIER YOUR NURSERY ROOM WILL BE.

ENGLISH DOVE-TAIL

Romina drawers are constructed with "half-blind" English dove-tails, the ultimate and most sophisticated drawer technique currently available. Drawer walls have "tails" which are housed in special sockets in the adjacent boards. Sockets are mitered at a certain angle so that all boards interlock for a superior joint which do not require additional fastening means. While this is just optional, we do add our organic treesap based glue, as well as a few concealed nails to make these drawer boxes last forever and reduce the inner tension factor caused by the inherent expansion and shrinkage of wooden products.

ENGLISH DOVETAIL MEANS LONGEVITY AND STRUCTURAL RESISTANCE. DRAWERS ARE THE MOST IMPORTANT PART OF A DRESSER, MAKE SURE THEY ARE WELL MADE.

ANTI-DETACHMENT DRAWERS

Drawer boxes are designed with a special rear locking hook where the under-mount glide secures the drawer and prevents tipping on a vertical plane. This feature is especially important for children who are natural adventurers and it is not a matter of "if" but "when" they will attempt climbing onto the furniture. Knowing that your drawers won't detach and fall over thus preventing injuries, means peace of mind and safety at work. We strongly recommend that you secure all large dressers to the wall using our (included) wall anchoring system which, paired with the anti-detachment system make your Romina set, the safest furniture for your growing family.

FINISHES

Our finishes are all made of organic and non-toxic ingredients. There is no added lead, phthalates, hard metals, VOCs or any chemical components that could or would be harmful for an infant. Our multi-step finishing process preserves the non-toxic nature of our finish ingredients while increasing surface durability and longevity.

Skilled furniture artisans meticulously perform finishing techniques and abrasive surface correction until proper consistency and wood penetration is obtained. Water-based finishes then get a final clear lacquer to seal the finished surface and provide resistance and comfort. Oil-Based finishes saturate the wood to provide a protective layer yet maintaining the rustic and organic feel of the wood.

The layered finishing operation eliminates the need to use solvents or other artificial hardeners in the finishing solution. Water-based clear coatings have superior resistance to mechanical impact, friction and environmental factors. Natural oxidation, aging or color fading tend to be less significant and slower acting on water-based finishes and hardwoods.

ANTONIO COLLECTION

**ANTONIO IS BOLD BUT SUBTLE,
A STRONG BUT DELICATE WOODEN
SCULPTURE.**

Antonio is the modern evolution of classic design. Bold pedestal legs are sculpted in solid wood for a refreshing "Queen Anne" note complemented by the contour wrap-around apron and framed drawer fronts. Soft curves and solid lines upcycle traditional looks into modern lifestyle with an abundance of sophistication. Timeless Elegance and Exquisite Craftsmanship.

All case items are equipped with wooden knobs or handles. You can customize your furniture with one of our 15 handle options made in Italy with the finest metals and crystals.

Construction key facts:

- Made in Europe
- 100% Solid Hardwood
- Non-toxic, water-based and Organic oil finishes
- No formaldehyde or VOC emissions
- Metal Mattress support with 3 height settings
- Periodically tested to meet and exceed CPSC standards
- GREENGUARD Gold Certified

NEW YORK COLLECTION

**MID-CENTURY MODERN. IDEAL FOR
SMALL SPACES WITH BIG IDEAS.**

Sleek straight lines and softly angled legs, not too much pattern and color variation. They might call this mid-century but we made it mid-century Awesome. Awesome and Simple. Maybe not too simple but functional and beautiful. Laser Cut applique and two-tone options elevate the minimalist concept for maximum design.

All case items are equipped with wooden knobs or handles. You can customize your furniture with one of our 15 handle options made in Italy with the finest metals and crystals.

Construction key facts:

VENTIANNI COLLECTION

**BOLD BUT NOT OVERWHELMING
PRESENCE, MODERN AND
COMFORTABLE**

Ventianni Collection is inspired by the simplicity of the 1920's clean lines, substantial but balanced proportions and accentuated by color variation. The 20's were good years, the 20's are always a good age, beautiful and exuberant.

All case items are equipped with wooden knobs or handles. You can customize your furniture with one of our 15 handle options made in Italy with the finest metals and crystals.

OFFICE

The place where you accomplish all of your goals, aspirations and affirmations. While comfort is essential in any office, an office that is too casual may seriously impede the ability to get things done.

LIFESTYLE

BEDROOM

The room where you spend a part of your life, where your day begins and ends, where your body needs to renew itself, where you are most vulnerable, where you reconnect with yourself. Your Bedroom is the one room in your life that most affects your ability to be powerful, healthy, happy, and wealthy.

CLEOPATRA COLLECTION

"Age cannot wither her, nor custom stale her infinite variety!"

EXCLUSIVE COLLECTION

Silver leaf and mosaic carefully applied by hand, beautifully sculpted legs with gold gilding, any piece from the Exclusive collection can be considered a piece of art.

IMPERIO COLLECTION

Imperio Collection is the Classy Classic.

VENTIANNI COLLECTION

Bold but not overwhelming, Modern and Comfortable.

LIVING ROOM

The living room is the first place our guests see when they enter in our house and it has to be spotless. Choosing the right pieces can be tricky, but we have the solution regardless of your taste.

The living room reminds us of a lot of rosy memories, always full of happiness and pleasure, where we spend time bonding with family and friends.

We always try to accomplish the hardest things. Thoroughly hand painted or manually applied leaf, our team of designers can customize any piece of furniture in order to satisfy even the most demanding requirements.

KITCHEN

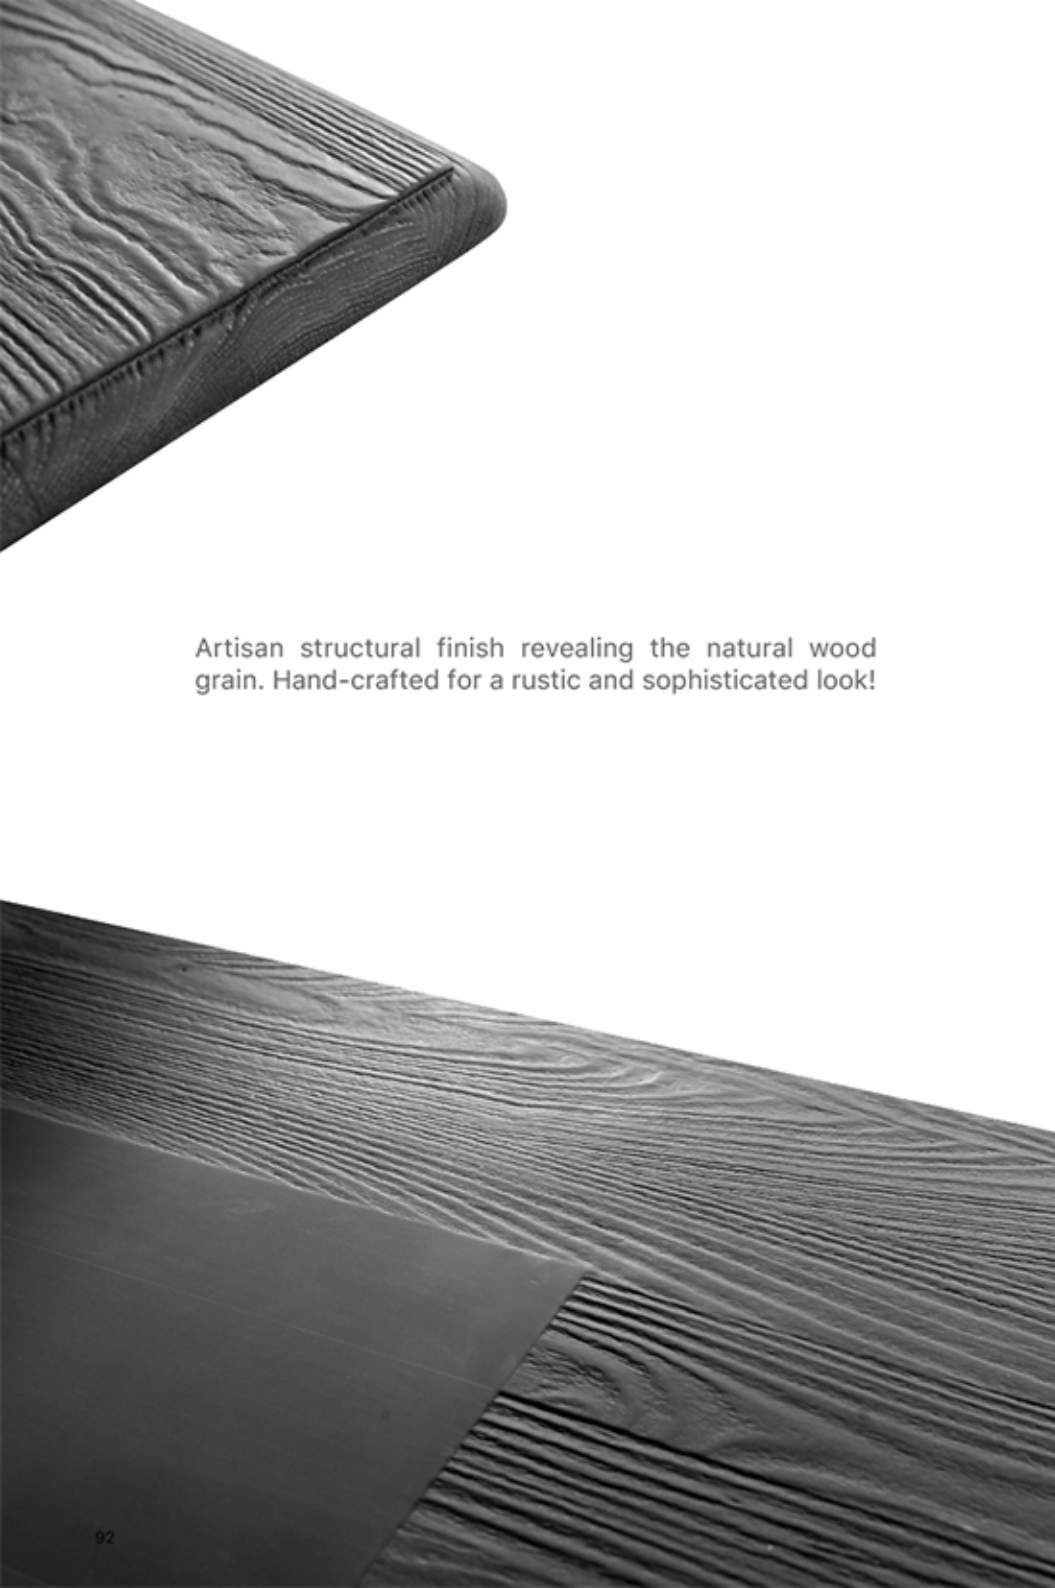

Some say that while life may be created in bedroom, it is certainly lived in the kitchen. Whether small or large, the kitchen is the place where meals are created – it fuels the bodies, minds and souls of friends and families.

Artisan structural finish revealing the natural wood grain. Hand-crafted for a rustic and sophisticated look!

BATHROOM

Get your best ideas in the shower? The bathroom is the one room in which we are able to finally switch off from all that is going on around us and simply be alone with our thoughts, and reflect on the day.

My grandfather used to say that wood is not a material, it is a living being. This is true. Every piece of furniture that you bring into your home is a “person” that should instantly bond to your soul, to your intimate living space. It does not only need to be durable and practical, but charming enough to win your heart. Our furniture has all these features. Throughout 3 generations of experience in the furniture industry, we have learnt that the latest materials and technologies must achieve one goal: to reveal the “soul” of wood in every collection that we produce. The authentic European design and high standard fabrication, together with a deep understanding of the values, aspirations and lifestyle of one’s family are added to our tradition and experience in wood manufacturing to improve continuously the quality of one’s living. Look, feel and touch every piece of furniture of our collections and you will immediately understand our company’s passion to deliver lifelong products.
